

SVETLANA BRZEV & KEYA MITRA

Earthquake-Resistant Confined Masonry Construction

3rd
Edition

About the Book:

This book is written for building professionals interested in learning more about confined masonry (CM) construction and for those who would like to promote its application in India. Over the last 100 years, CM construction has emerged as a building typology that offers an alternative to both URM and RC frame construction in countries and regions of extremely high seismic risk. This book is part of an initiative launched in India to promote CM construction based on its proven record of good seismic performance.

This publication was originally authored by Svetlana Brzev as a monograph "Earthquake-Resistant Confined Masonry Construction", published by NICEE in 2007. More than 3000 copies of the monograph were circulated in English and Hindi over the last 10 years.

CM construction has a great potential for saving lives and property in areas of high seismic risk in India.. It is expected that the explanations of key concepts of seismic design and construction of CM buildings found in this book will be useful to building professionals and academics interested in learning more about this construction technology and in engaging in its design and construction.

Contents:

- Earthquakes and How They Affect Buildings
- Confined Masonry: Key Components and Worldwide Applications
- How are Confined Masonry Buildings Different from Unreinforced Masonry and RC Frames with Masonry Infills?
- How Earthquake Forces are Resisted in Confined Masonry Buildings
- How Confined Masonry Buildings Performed in Past Earthquakes
- Conceptual Architectural Planning and Design of Confined Masonry Buildings
- Preliminary Seismic Safety Check for CM Buildings
- Construction of CM Buildings
- Concluding Remarks

How to Order:

Interested persons may obtain copies on payment of ₹400/- per copy (overseas order may add ₹700/- per copy to cover air-mail postage and handling), by sending an email with their complete name, affiliation, organization and postal address to nicee@iitk.ac.in. Payment can be made by credit card at web site www.nicee.org/payment.php. The payment can also be made by a draft/cheque in favour of 'National Information Centre of Earthquake Engineering' payable at Kanpur. Outstation cheques, not payable at par at Kanpur, will also be accepted and should add ₹105/- as bank charges. The requests should be sent to:

Cdr. Suresh Ailawadi
National Information Centre of Earthquake Engineering
Indian Institute of Technology Kanpur, Kanpur 208 016, INDIA
Phone: (0512) 259 7866, Fax: (0512) 259 7794
e-mail: nicee@iitk.ac.in

9 789380 903064

ISBN 978-93-80903-06-4
